Be Alert!
Look for electric power lines before work to stay safe.

Never Touch a Power Line.
Electricity, powerful enough to kill, flows through metal poles, ropes or any other conductive objects used for tree pruning that touch a power line.

Power lines are not insulated.
Stay away for safety.

Keep Tools And Trucks Clear.
Electrocutions can occur when tools, trucks, or tree limbs touch or even get too close to power lines.

Avoid All Power Lines.
Treat every power line like it’s energized. If you see a downed power line, stay away and call 911.

Stay Away from Downed Power Lines.
If you see a downed power line, do not touch it or anything touching the line because the line may still be energized. Keep others away from the line and call 9-1-1.
