

Application of Oncor Electric Delivery Company LLC to Obtain or Amend a Certificate of Convenience and Necessity for a Proposed CREZ 345 kV Transmission Line in Archer, Clay and Jack Counties, Texas

PUBLIC UTILITY COMMISSION OF TEXAS (PUC) DOCKET NO. 37015

Oncor Electric Delivery Company LLC provides this notice of intent to amend its Certificate of Convenience and Necessity for the rebuild of an existing 345 kV transmission line located within Archer, Clay, and Jack Counties. The estimated cost of this project is \$50,870,000. A map of the project area with the route of the existing transmission line appears with this notice. A complete copy of the application filed at the Public Utility Commission of Texas and a large scale map of the project area depicting the route of the existing transmission line may be viewed at the following locations:

City Hall
City of Holliday
129 W. Olive
Holliday, Texas 76366

City Hall
City of Jacksboro
112 W. Belknap
Jacksboro, Texas 76458

Persons with questions about the transmission line may contact Travis Besier at 214-486-7333. Persons who wish to intervene in the docket or comment on the applicant's application should mail the original and 10 copies of their requests to intervene or their comments to:

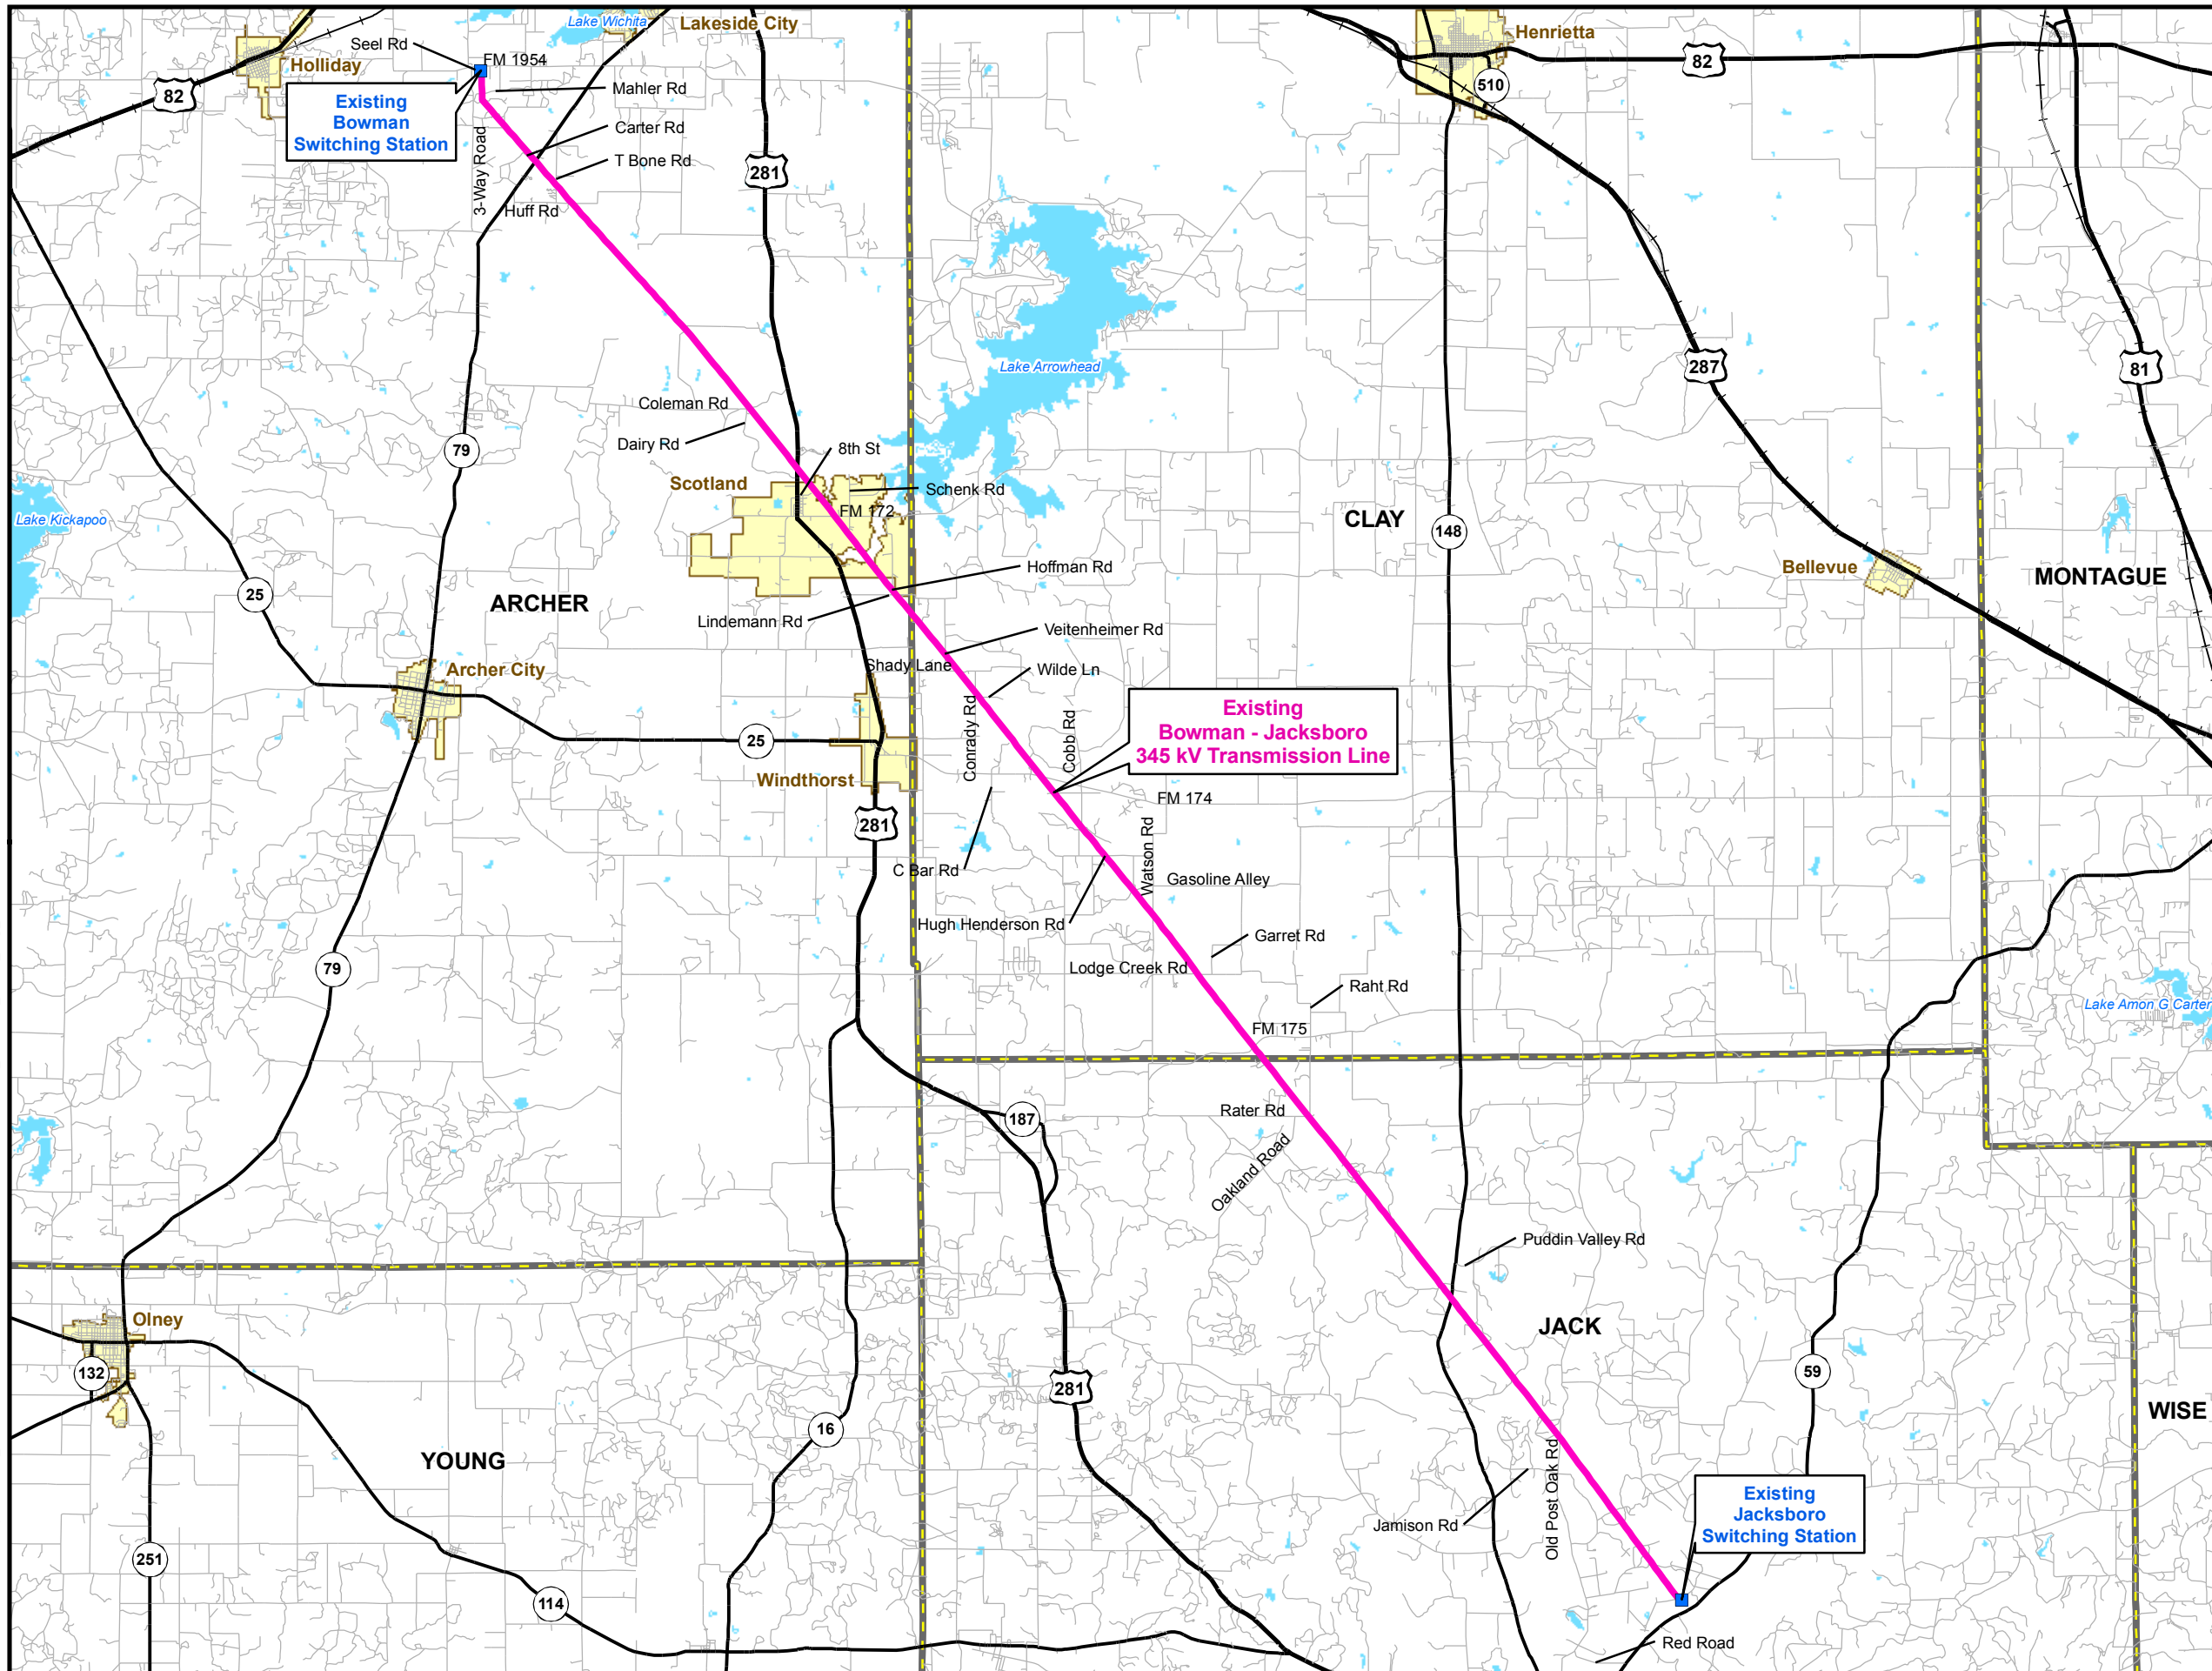

Public Utility Commission of Texas
Central Records
Attn: Filing Clerk
1701 N. Congress Avenue
P. O. Box 13326
Austin, Texas 78711-3326

Persons who wish to intervene in the docket must also mail a copy of their request for intervention to all parties in the docket and all persons that have pending motions to intervene, at or before the time the request for intervention is mailed to the PUC.

The deadline for intervention in the docket is **July 13, 2009**, (45 days after the date the application was filed with the PUC), and the PUC should receive a letter from anyone requesting intervention by that date.

The PUC has a brochure titled “Landowners and Transmission Line Cases at the PUC for Competitive Renewable Energy Zone (CREZ) Projects.” Copies of the brochure are available from Travis Besier at 214-486-7333 or may be downloaded from the PUC’s website at www.puc.state.tx.us. To obtain additional information about this docket, you may contact the PUC’s Customer Assistance Hotline at (512) 936-7120 or (888) 782-8477. Hearing-and speech-impaired individuals with text telephones (TTY) may contact the PUC’s Customer Assistance Hotline at (512) 936-7136 or toll free at (800) 735-2989.

345 kV Transmission Line
Notice Map

Oncor's Proposed Bowman to Jacksboro 345 kV Transmission Line Route Description

The proposed transmission line project consists of rebuilding an existing transmission line. The proposed 46-mile long double circuit 345 kV transmission line is to be constructed along the centerline of the existing single circuit Bowman – Jacksboro 345 kV transmission line, within the existing 150 ft wide transmission line right-of-way. Prior to construction of the proposed double circuit transmission line, the existing single circuit line will be removed.

The proposed transmission line begins at the existing Oncor Electric Delivery Company LLC's Bowman Switching Station located approximately 660 feet east of Seel Road and approximately 655 feet south of Farm-to-Market Road (FM) 1954 in Archer County, Texas. From the Bowman Switching Station, the proposed transmission line route extends in a southerly direction for approximately 3,545 feet, to an angle point approximately 1,050 feet east of 3-Way Road and approximately 800 feet south of Mahler Road. From this point, the proposed transmission line continues in a southeasterly direction for approximately 10,330 feet to a point that is directly west of State Highway 79 and approximately 30 feet northwest of the intersection of State Highway (SH) 79 and Carter Road. This segment of the proposed transmission line will cross over several unnamed roads. From this point, the proposed transmission line continues in a southeasterly direction for approximately 4,045 feet to a point that is directly west of T Bone Road and approximately 2,170 feet north of the intersection of T Bone Road and Huff Road. This segment of the proposed transmission line will cross over SH 79. From this point, the proposed transmission line continues in a southeasterly direction for approximately 37,210 feet to a point that is directly north of Coleman Road and approximately 360 feet east of the intersection of Coleman Road and Dairy Road. This segment of the proposed transmission line will cross over T Bone Road, Huff Road, and several unnamed roads. From this point, the proposed transmission line continues in a southeasterly direction for approximately 9,590 feet to a point that is directly west of U.S. Highway 281 and is approximately 3,450 feet north of the intersection of U.S. Highway 281 and 8th Street. This segment of the proposed transmission line will cross over Coleman Road. From this point, the proposed transmission line continues in a southeasterly direction for approximately 7,750 feet to a point that is directly north of FM 172 and is approximately 1,820 feet west of the intersection of FM 172 and Schenk Road. This segment of the proposed transmission line will cross over U.S Highway 281. From this point, the proposed transmission line continues in a southeasterly direction for approximately 11,810 feet to a point that is directly west of Hoffman Road and is approximately 585 feet north of the intersection of Hoffman Road and Lindemann Road. This segment of the proposed transmission line will cross over FM 172. From this point, the proposed transmission line continues in a southeasterly direction for approximately 10,540 feet to a point that is directly west of Veitenheimer Road and is approximately 2,120 feet north of the intersection of Veitenheimer Road and Shady Lane. This segment of the proposed transmission line will cross over Hoffman Road and Lindemann Road and will cross the Archer County/Clay County line.

From this point, the proposed transmission line continues in a southeasterly direction for approximately 6,200 feet to a point that is directly west of Conrady Road and is approximately 530 feet north of the intersection of Conrady Road and Wilde Lane. This segment of the proposed transmission line will cross over Veitenheimer Road and Shady Lane. From this point, the proposed transmission line continues in a southeasterly direction for approximately 13,555 feet to a point that is directly north of FM 174 and is approximately 6,320 feet east of the intersection of FM 174 and C Bar Road. This segment of the proposed transmission line will cross over Conrady Road and Wilde Lane. From this point, the proposed transmission line continues in a southeasterly direction for approximately 8,055 feet to a point that is directly west of Cobb Road and is approximately 3,880 feet north of the intersection of Cobb Road and Hugh Henderson Road. This segment of the proposed transmission line will cross over FM 174 and several unnamed roads. From this point, the proposed transmission line continues in a southeasterly direction for approximately 4,775 feet to a point that is directly north of Hugh Henderson Road and is approximately 3,335 feet east of the intersection of Cobb Road and Henderson Road. This segment of the proposed transmission line will cross over Cobb Road. From this point, the proposed transmission line continues in a southeasterly direction for approximately 9,565 feet to a point that is directly west of Watson Road and is approximately 3,630 feet south of the intersection of Watson Road and Gasoline Alley. This segment of the proposed transmission line will cross over Hugh Henderson Road and several unnamed roads. From this point, the proposed transmission line continues in a southeasterly direction for approximately 9,210 feet to a point that is directly north of Lodge Creek Road and is approximately 2,050 feet west of the intersection of Lodge Creek Road and Garrett Road. This segment of the proposed transmission line will cross over Watson Road and several unnamed roads. From this point, the proposed transmission line continues in a southeasterly direction for approximately 11,905 feet to a point that is directly northwest of FM 175 and is approximately 7,590 feet west of the intersection of FM 175 and Raht Road. This segment of the proposed transmission line will cross over Lodge Creek Road. From this point, the proposed transmission line continues in a southeasterly direction for approximately 11,130 feet to a point that is directly north of Rater Road and is approximately 1,705 feet east of the intersection of Rater Road and Oakland Road. This segment of the proposed transmission line will cross over FM 175 and several other unnamed roads and will cross the Clay County/Jack County line. From this point, the proposed transmission line continues in a southeasterly direction for approximately 29,130 feet to a point that is directly west of SH 148 and is approximately 4,475 feet south of the intersection of SH 148 and Puddin Valley Lane. This segment of the proposed transmission line will cross over Rater Road and several unnamed roads. From this point, the proposed transmission line continues in a southeasterly direction for approximately 22,445 feet to a point that is directly west of Old Post Oak Road and is approximately 4,310 feet north of the intersection of Old Post Oak Road and Jamison Road. This segment of the proposed transmission line will cross over SH 148 and several unnamed roads. From this point, the proposed transmission line continues in a southeasterly direction for approximately 25,300 feet to an angle point located approximately 1,735 feet north of SH 59. This segment of the proposed transmission line

will cross over Old Post Oak Road and several unnamed roads. From this point, the proposed transmission line turns in a northeasterly direction for approximately 370 feet to an angle point. From this angle point, the proposed transmission line turns in a southeasterly direction for approximately 295 feet to the Oncor Electric Delivery Company LLC's Jacksboro Switching Station, located approximately 1,070 feet northwest of State Highway (SH) 59, approximately 10,300 feet northeast of the intersection of SH 59 and Red Road, in Jack County, Texas. The estimated cost for the proposed transmission line project is \$50,870,000.
