

**NOTICE OF PUBLIC PARTICIPATION MEETING
FOR THE PROPOSED CENTRAL B – CENTRAL A
345 KV TRANSMISSION LINE PROJECT**

MONDAY
APRIL 27, 2009
4:00 pm – 8:00 pm
WESTERN TEXAS COLLEGE
VISITOR'S CENTER
6200 COLLEGE AVENUE
SNYDER, TEXAS 79549

Oncor Electric Delivery Company LLC (Oncor) is proposing to construct a new 345 kilovolt (kV) electric transmission line in Scurry County, Texas. The proposed transmission line will be approximately 20 miles long, depending upon the route certificated by the Public Utility Commission of Texas. The proposed transmission line will connect the proposed Central B Switching Station (to be located north of County Road 2128 and east of County Road 2127) to the proposed Central A Switching Station (to be located south of County Road 486 and east of State Highway 208) in Scurry County (see associated map).

Oncor is committed to routing the proposed transmission line in a manner consistent with the values of the local communities, the Texas Utilities Code, and the Public Utility Commission of Texas rules and policies. The project has been recommended by the Electric Reliability Council of Texas (ERCOT) to ensure continued safe and reliable electric service to the State in light of increased integration of electric energy generated by wind production facilities. Completion of the project will enable the new transmission system to efficiently move wind-generated power to market and will add capacity to the entire system. In support of the routing process, Oncor is holding a public open house meeting to solicit input for use in determining the preferred route for the proposed transmission line and to share information about line routing alternatives. HDR Engineering (HDR), a consulting firm retained by Oncor for the project, has identified preliminary alternative transmission line routes for consideration which are shown as dashed lines on the associated map. Maps with greater detail will be exhibited at the meeting. Individuals attending this “come and go” open house meeting will have an opportunity to ask questions and provide comments to representatives and technical experts from Oncor and HDR regarding the routing of the proposed transmission line. These preliminary alternative routes are subject to modification based on information received at this public meeting and further study. If you have any questions concerning this meeting, please contact Martha Henson at 214-486-7334.
