

# NOTICE OF PUBLIC PARTICIPATION MEETINGS FOR THE PROPOSED KRUM WEST—ANNA 345 kV TRANSMISSION LINE PROJECT

**MONDAY**  
June 14, 2010

**GAINESVILLE**

Gainesville High School Cafeteria  
2201 South I-35 Frontage Road

4:00 - 8:00 P.M.

**TUESDAY**  
June 15, 2010

**AUBREY**

Aubrey High School Cafeteria  
510 Spring Hill Road

4:00 - 8:00 P.M.

**WEDNESDAY**  
June 16, 2010

**CELINA**

Celina Middle School Cafeteria  
710 East Pecan Street

4:00 - 8:00 P.M.

**THURSDAY**  
June 17, 2010

**WHITESBORO**

Whitesboro High School Cafeteria  
#1 Bearcat Drive

4:00 - 8:00 P.M.

Oncor Electric Delivery Company LLC (Oncor) is proposing to construct a new 345 kilovolt (kV) electric transmission line in Collin, Cooke, Denton, and Grayson Counties. The proposed transmission line will be approximately 46-100 miles long, depending upon the route certified by the Public Utility Commission of Texas. The proposed transmission line will connect the Krum West Switching Station (to be located northwest of the City of Krum in Denton County) to the existing Anna Switching Station (located south of the City of Weston in Collin County).

Oncor is committed to routing the proposed transmission line in a manner consistent with the values of the local communities, the Texas Utilities Code, and the Public Utility Commission of Texas rules and policies. The project was recommended by the Electric Reliability Council of Texas (ERCOT) to ensure continued safe and reliable electric service to the State in light of increased integration of electric energy generated by wind production facilities. Completion of the project will enable the transmission system to efficiently move wind-generated electric power to market and will add valuable capacity to the entire transmission system. In support of the routing process, Oncor is holding four public participation meetings to solicit input for use in determining routes for the proposed transmission line and to share information about routing alternatives. Halff Associates, a consulting firm retained by Oncor for the project, has identified preliminary alternative transmission line routes for consideration, which are shown as dashed lines on the provided map, and will be available at the meetings to discuss these routes. Maps with greater detail will be exhibited at the meetings. Individuals attending these "come and go" open house meetings will have an opportunity to ask questions and provide technical information to representatives and technical experts from Oncor and Halff Associates regarding the routing of the proposed transmission line. These preliminary alternative routes are subject to modification based on further study and information received at the public meetings. If you have any questions concerning these meetings, please contact Travis Besier at (214) 486-7343.
