

NOTICE OF PUBLIC PARTICIPATION MEETINGS FOR THE PROPOSED OKLAUNION – BOWMAN 345 kV TRANSMISSION LINE PROJECT

MEETING LOCATIONS

April 22, 2009 - Wednesday

ELECTRA

Electra Junior High School
601 South Bailey

4:00 - 8:00 PM

April 23, 2009 - Thursday

HOLLIDAY

Holliday Elementary School Cafeteria
751 College Avenue

4:00 - 8:00 PM

Oncor Electric Delivery Company LLC (Oncor) is proposing to construct a new 345 kilovolt (kV) electric transmission line in Archer, Wichita, and Wilbarger Counties. The proposed transmission line will be approximately 40 miles long, depending upon the route certificated by the Public Utility Commission of Texas. The proposed transmission line will connect the existing Bowman Switching Station (located south of the City of Wichita Falls in Archer County) to the new Riley Switching Station (AEP) located east of the existing Oklaunion Generating Station (located southeast of the City of Vernon in Wilbarger County).

Oncor is committed to routing the proposed transmission line in a manner consistent with the values of the local communities, the Texas Utilities Code, and the Public Utility Commission of Texas rules and policies. The project has been recommended by the Electric Reliability Council of Texas (ERCOT) to ensure continued safe and reliable electric service to the State in light of increased integration of electric energy generated by wind production facilities. Completion of the project will enable the new transmission system to efficiently move wind-generated electric power to market and will add valuable capacity to the entire transmission system. In support of this routing process, Oncor is holding two public participation meetings to solicit input for use in determining the preferred route for the proposed transmission line and to share information about line routing alternatives. Halff Associates, a consulting firm retained by Oncor for the project, has identified preliminary alternative transmission line routes for consideration, which are shown as dashed lines on the provided map, and will be available at the meetings to discuss these routes. Maps with greater detail will be exhibited at the meetings. Individuals attending these “come and go” open house meetings will have an opportunity to ask questions and provide technical information to representatives and technical experts from Oncor and Halff Associates regarding the routing of the proposed transmission line. These preliminary alternative routes are subject to modification based on further study and information received at the public meetings. If you have any questions concerning these meetings, please contact Travis Besier at (214) 486-7337.
