Additional Design Charge

This charge is made for preparing iterative designs to provide new service to a specific location where such iterations are at the request of the Retail Customer/CR for the Retail Customer's sole benefit. The initial two designs on a project will be included in the system charges; **any additional designs will be done at Retail Customer's expense pursuant to this charge.**

It is the responsibility of the developer to clear rights-of-way, establish final grade and provide staking of property corners prior to the installation of Company facilities. Developer is also responsible for staking, exposing or otherwise marking any existing facilities where Oncor Electric Delivery would need to use caution in digging.
