Odessa, Texas

5:00 PM – 7:00 PM

Wednesday, May 21, 2025

KERMIT

Kermit Civic Center
838 Telford Avenue
Kermit, Texas

5:00 PM – 7:00 PM

Oncor Electric Delivery Company LLC (Oncor) is proposing to construct a new 765 kilovolt (kV) transmission line in Texas between the expansion of Oncor's existing Longshore Switch, located approximately 4.5 miles west of the City of Forsan in Howard County, and the expansion of Oncor's existing Drill Hole Switch located 6 miles west of US 285 near the Culberson County/Reeves County Line (Project).

Oncor is committed to routing the proposed transmission line in a manner consistent with the values of local communities, the Texas Utilities Code, and the Public Utility Commission of Texas's rules and policies. In support of this Project, Oncor is holding three public participation meetings to solicit input regarding routing alternatives for the Project. Kimley-Horn and Associates (Kimley-Horn) and Halff Associates (Halff), consulting firms retained by Oncor for the Project, have identified preliminary alternative transmission line route links, which are shown as dashed lines on the provided map. Maps with greater detail will be exhibited at the meetings. Individuals attending these "come-and-go" open house meetings will have an opportunity to ask questions and provide comments to representatives and technical experts from Oncor, Kimley-Horn, and Halff regarding the routing of the Project. These preliminary alternative route links are subject to modification based on information received at the public participation meetings and further studies. If you have any questions concerning the Project or these meetings, please contact Mr. Jonathan Richards at Oncor at (214) 486-3434 or email transmissionprojects@oncor.com.

For more information, please visit Oncor's website at www.oncor.com/transmissionprojects.
