

**ONCOR ELECTRIC DELIVERY COMPANY LLC
PUBLIC PARTICIPATION MEETING FOR THE PROPOSED
PORTERVILLE SUBSTATION – SHIFTING SANDS SUBSTATION 138 kV
TRANSMISSION LINE PROJECT**

Tuesday, January 27, 2026

Kermit Civic Center
838 Telford Avenue
Kermit, Texas

5:00 PM – 7:00 PM

1. In your opinion, has the need for the project been adequately explained to you?
Yes _____ No _____ (How could we have improved this effort?)

2. Were the exhibits and explanations of the need for the project helpful to you?
Yes _____ No _____

3. Was the information presented helpful for your understanding of the project?
Yes _____ No _____

4. The Public Utility Commission of Texas requires that several factors be considered when routing an electric transmission line, including:

- Proximity to single-family and multi-family dwellings and related structures, mobile homes, apartment buildings, commercial structures, industrial structures, business structures, churches, hospitals, nursing homes, and schools;
- Proximity to commercial radio transmitters, microwave relay stations, or other electronic installations;
- Proximity to parks and recreational areas;
- Proximity to FAA-registered airports, private airstrips, and heliports;
- Proximity to historical or archeological sites;
- Agricultural areas irrigated by traveling irrigation systems;
- Environmentally sensitive areas, and
- Protected or endangered species.

Kimley-Horn has plotted all the known features listed above on the Environmental and Land Use Constraints Map. To your knowledge, are the features shown on the map accurately plotted? Yes

_____ No _____

Are you aware of any of the above features that are not presently shown or are incorrectly located on the map? Yes _____ No _____

If yes, would you please help us identify the approximate location of any missing or incorrectly located features in the space below? _____

5. The routing of a transmission line also includes consideration of several land use factors. Please rank the following factors in order of importance to you. Indicate the most important factor with a number "1," the second most important with a number "2," and so on.

- _____ a) Minimize the overall length of the line
- _____ b) Minimize the length across cultivated land
- _____ c) Minimize the length across pastureland
- _____ d) Minimize the length across road frontage
- _____ e) Minimize the length across residential areas
- _____ f) Minimize the length across wooded areas
- _____ g) Minimize the visibility of the line
- _____ h) Other (please specify)

6. The routing of a transmission line also includes consideration of utilizing parallel and/or existing corridors (e.g. existing transmission line and roadway corridors). Please rank the following existing corridors within the project study area that you would prefer the new transmission line to parallel and/or use. Indicate your first preference with the number "1," your second preference with the number "2," and so on.

- _____ a) Maximize the distance along existing transmission line corridors
- _____ b) Maximize the distance along existing roadway corridors
- _____ c) Maximize the distance along existing railroad corridors
- _____ d) Maximize the distance along existing property boundaries
- _____ e) Other (please specify)

7. The routing of a transmission line also includes consideration of the distance from the proposed transmission line to habitable structures and community resources. Please rank the following in the order that you would prefer to maximize the distance from the proposed transmission line. Indicate your first preference with the number "1," your second preference with the number "2," and so on.

_____	a)	Maximize the distance from residences, including single-family and multi-family dwellings
_____	b)	Maximize the distance from commercial, industrial, and/or business structures
_____	c)	Maximize the distance from churches
_____	d)	Maximize the distance from hospitals
_____	e)	Maximize the distance from nursing homes
_____	f)	Maximize the distance from schools
_____	g)	Maximize the distance from parks/recreational areas
_____	h)	Maximize the distance from historical and archaeological sites
_____	i)	Other (please specify)

8. In your opinion, are there any other factors or features that should be considered in determining the location of the proposed transmission line?

Yes _____ No _____

If yes, please list them in the space below.

9. How did you learn about this open house?

10. Which of the following applies to your situation?

_____	a)	Proposed transmission line route is near my home
_____	b)	Proposed transmission line route is near my business
_____	c)	Proposed transmission line route is on my land
_____	d)	Other, please specify: _____

11. If you would like, please enter your name and address below.

Name _____

Address _____

City/State _____ Zip _____

12. Do you have any general remarks or comments?

This image shows a full page of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page, typical of notebook paper. There are no margins, text, or other markings on the page.

Thank you for your comments.
