

40 MINUTE  
PRESENTATION!

## TEXAS' KIDS CAN NOW LEARN ABOUT ELECTRIC SAFETY IN A FUN, MEMORABLE WAY!

For more than 100 years, Oncor has made safety a priority in our community. That's why we've created Oncor Super Safe Kids, a traveling educational experience that teaches elementary school kids about the importance of electric safety, how to identify potential dangers and what to do in harmful situations.

Since 2018, the Oncor Super Safe Kids team has travelled across Texas to raise awareness and bring electric safety to life for kids, educators and other organizations in the community.

Through engaging activities, fun characters, videos and an "electrifying" demonstration, the team at Oncor will take kids through a memorable 40-minute experience.

### Plus great giveaways:

After the presentation, kids will receive a Super Safe Kids activity book, refrigerator magnet and plastic hard hat to take home.

**To schedule the Oncor Super Safe Kids team at your school or community event, please request a live event at [oncorsafekids.com](http://oncorsafekids.com).**

### What kids will learn:

- ⚠️ The impact electricity has on our everyday lives
- ⚠️ The dangers of power lines and other outdoor utility equipment
- ⚠️ Storm safety and preparation tips

### Who is Oncor?

Oncor is a regulated electric transmission and distribution service provider that serves nearly 13 million customers across Texas. Using cutting-edge technology, more than 4,500 employees safely maintain reliable electric delivery service with the largest distribution and transmission system in Texas, made up of approximately 140,000 miles of lines and more than 3.8 million meters across the state. Visit [oncor.com](http://oncor.com) to learn more.
