

ONCOR PRINCIPLES, POLICIES AND PROCEDURES

<i>Title:</i>	Supplier Engagement and Development
<i>Responsible Officer:</i>	Senior Vice President and Chief Operating Officer
<i>Last Reviewed/Revised Date:</i>	June 25, 2026

Purpose

At Oncor, we recognize that a strong Supplier Engagement and Development Initiative can broaden the economic vitality and prosperity of the communities we are privileged to serve. Affording all citizens an equal opportunity to participate in our procurement processes makes good business sense as it enhances our ability to call upon the resources of our entire community. The strength of our corporate commitment to the growth, development, and utilization of a broad representation of suppliers is reflected in this policy.

Supplier Engagement and Development Policy Statement

It is the policy of Oncor to procure goods and services from qualified suppliers and contractors. This Policy provides for development and engagement of businesses of all sizes and backgrounds, with a goal of expanding access to Oncor procurement opportunities to more suppliers. Oncor will actively seek qualified suppliers, particularly small businesses, historically underutilized businesses, and those operating in communities served by Oncor, with which to do business and will endeavor to assist these business concerns with their development. In furtherance of this policy, Oncor will participate in activities, organizations and programs, to engage and promote such enterprises. In addition, the Company will strive to provide maximum practicable opportunity to companies with federal designations as a small business.

Our sourcing practices are designed to promote fairness, transparency and equal access for all qualified suppliers. Administration and implementation of this Policy is the responsibility of all organizations and business units throughout Oncor, with support of the Supply Chain organization.
